2. During the past six months Soviet military missions have attempted to reorganize the Bulgarian, Rumanian and Hungarian forces on a Soviet system. Similar to the Soviet mechanized divisions the Satellite mechanized divisions now include three infantry regiments (instead of two) and artillery guns of 130 and 170 mm. caliber. The fire power of these regiments has been increased by 120 and 170 mm. mortars.
 3. A new type of aircraft, four motors, jet propelled, with the marking PE 16X, was noticed for the first time at the Ianca and the Mamaia airfields. According to rumors at these airfields, this plane is to carry atomic bombs.
